FCCA8-DM **SIGWT-3** **PT500** **PT500**	Free cooling controller designed for motors with analogue input, equipped with two temperature probe PT500 inputs for precise thermal monitoring, one analogue output for proportional speed control of EC fan, and one relay output for auxiliary equipment control (damper actuator). All measured parameters, operating states, and configuration settings are accessible via Modbus RTU protocol or SenteraWeb. Supply voltage: 230 VAC ± 10%.	**Damper actuator** **EC fan**
