Article codes	Description	115 V or 230 V 1ph voltage controllable AC motor with TK	Article codes	Parameters	Values	Descriptions
<b>RTVS8-50L22</b> <b>DADCM-44</b>	Temperature based or 0-10 Volt fan speed controller for AC fans with single-phase motor, equipped with thermal contacts. The maximum motor current is 5 A. The supply voltage is in the range between 115 and 230 VAC. AC fan speed can be adjusted via an analogue control signal or based on the measured temperature. The DADCM module sends the requested fan speed to the RTVS8 fan speed controller. Modbus RTU communication can bridge greater distances than an analogue signal. Forward or reverse mode can be selected. All settings can be adjusted via Modbus RTU. The TK monitoring function disables the motor in case motor overheating is detected via the thermal contacts.
