Article codes	Description	AC fan Hot water valve (solenoid 230 VAC)	Article codes	Parameters	Values	Descriptions
GTH-1-xxL22 FLTSN-P500-040	Ambient temperature is measured. The higher the difference between the measured temperature value and the temperature setpoint, the higher the AC fan speed. The fan speed is controlled in 5-steps. The unregulated output controls a water valve or an electric heating element.
