STRA4-60L40	5-speed controller for air curtains with 3-phase fan(s) controllable by voltage. The combined maximum fan current is 6 A. The air velocity can be selected via the 5-step rotary switch. In OFF position (zero), the air curtain is disabled. Remote start/stop can controlled with external switch, such as a limit or end switch. The air curtain is activated when the switch is opened. TK monitoring function deactivates the fan(s) in case of overheating. After a power failure, the fan(s) will automatically restart.
