

# DSTHM-2

## Combined T and rH duct transmitter

The DSTHM-2 series are combined duct transmitters which measure temperature and relative humidity. Based on the temperature and relative humidity measurements, the dew point is calculated. They are Power over Modbus supplied and all parameters are accessible via Modbus RTU.

### Key features

- Selectable temperature and relative humidity ranges
- Bootloader for updating the firmware via Modbus RTU communication
- Modbus RTU (RS485)
- Long-term stability and accuracy

### Technical specifications

|                           |                              |                             |
|---------------------------|------------------------------|-----------------------------|
| Supply voltage            | 24 VDC, Power over Modbus    |                             |
| Maximum power consumption | 0,36 W                       |                             |
| Nominal power consumption | 0,27 W                       |                             |
| I <sub>max</sub>          | 15 mA                        |                             |
| Typical range of use      | Temperature range            | -30–70 °C                   |
|                           | Relative humidity range      | 0–100 % rH (non-condensing) |
| Accuracy                  | ± 0,4 °C (range -30–70 °C)   |                             |
|                           | ± 3% rH (range 0–100 %)      |                             |
| Min. airflow velocity     | 1 m / s                      |                             |
| Protection standard       | Enclosure: IP54, Probe: IP20 |                             |

### Modbus registers

The Sensistant Modbus configurator allows you to easily monitor and/or configure Modbus parameters.

The parameters of the unit can be monitored / configured through the 3SMODBUS software platform. You can download it from the following link:  
<https://www.sentera.eu/en/3SMCenter>

For more information about the Modbus registers, please refer to the product Modbus Register Map.

### Standards

- EMC Directive 2014/30/EC:
  - EN 61326-1:2013 Electrical equipment for measurement, control and laboratory use - EMC requirements - Part 1: General requirements
  - EN 61326-2-3:2013 Electrical equipment for measurement, control and laboratory use - EMC requirements - Part 2-3: Particular requirements - Test configuration, operational conditions and performance criteria for transducers with integrated or remote signal conditioning
- WEEE Directive 2012/19/EC
- RoHS Directive 2011/65/EC

### Article codes

|         | Supply      | Connection |
|---------|-------------|------------|
| DSTHM-2 | 24 VDC, PoM | RJ45       |

### Area of use

Monitoring duct temperature and relative humidity in HVAC applications

### Wiring and connections

|        |                                     |
|--------|-------------------------------------|
| 24 VDC | Supply voltage 24 VDC               |
| GND    | Ground                              |
| A      | Modbus RTU communication, signal A  |
| /B     | Modbus RTU communication, signal /B |

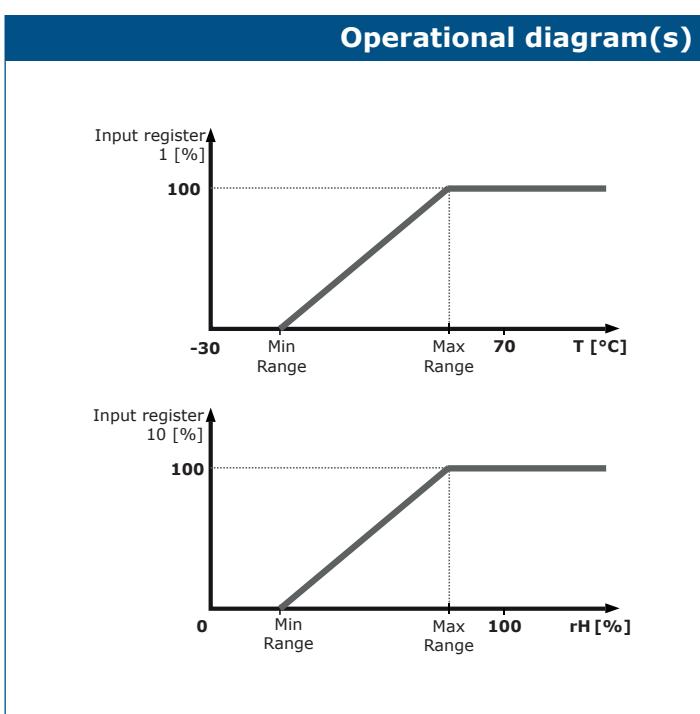

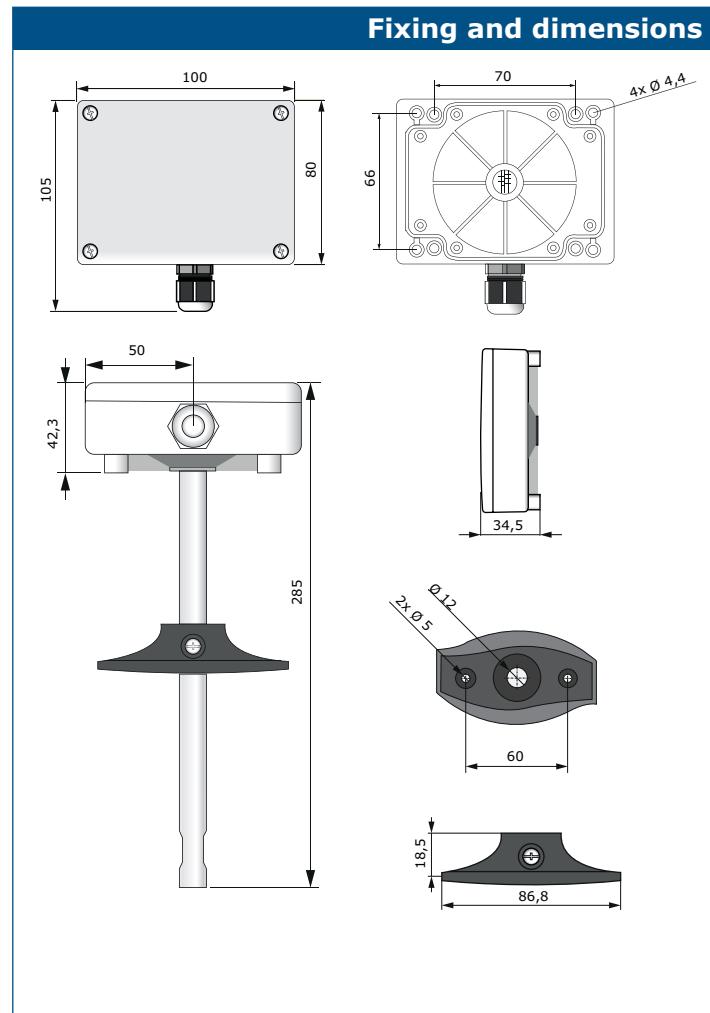

# DSTHM-2

Combined T and rH duct transmitter

### Settings

1 - RJ45 socket Plug the communication and power cable into the socket

### Packaging

| Article | Packaging     | Length [mm] | Width [mm] | Height [mm] | Net weight | Gross weight |
|---------|---------------|-------------|------------|-------------|------------|--------------|
| DSTHM-2 | Unit (1 pc.)  | 310         | 115        | 115         | 0,15 kg    | 0,258 kg     |
|         | Box (20 pcs.) | 590         | 380        | 505         | 3,00 kg    | 6,39 kg      |
