

HPS-X--LP Differential pressure transmitter

The HPS-X--LP series are differential pressure transmitters (-125–125 Pa), which are equipped with a fully digital pressure transducer designed for a wide range of applications. Air velocity readout is available by connecting an external Pitot tube connection set. All parameters are accessible via Modbus RTU (3SModbus software or Sensistant). They also feature integrated K-factor and an analogue / modulating output (0–10 VDC / 0–20 mA / 0–100 % PWM).

Key features

- Built-in digital high resolution differential pressure sensor
- Air velocity detection (by using an external PSET-PTX-200 Pitot tube connection set)
- Variety of operating ranges
- Selectable response time: 0,1-10 s
- Implemented K-factor
- Differential pressure, air volume⁽¹⁾ or air velocity⁽²⁾ readout via Modbus RTU
- Modbus registers reset function (to factory pre-set values)
- Selectable internal voltage source for PWM output: 3,3 / 12 VDC
- Four LED indicators for the status of the transmitter and the controlled values
- Modbus RTU communication
- Sensor calibration procedure
- Selectable minimum and maximum span
- Selectable analogue / modulating output
- Aluminium pressure connection nozzles

Article codes

Codes	Power supply	Maximum power consumption	Nominal power consumption	Imax	Operating range
HPS-FLP	18-34 VDC	1,3W	1,26 W	71 mA	
	18-34 VDC	1,3 W	1,26 W	70 mA	-125—125 Pa
HPS-GLP	15-24 VAC ±10 %	1 W	1 W	70 IIIA	

Technical specifications			
	0-10 VDC	$R_{L} \ge 50 \ k\Omega$	
Selectable analogue / modulating output	0—20 mA	$R_{L} \leq 500 \ \Omega$	
modulating output	0-100 % PWM	PWM Frequency: 1 kHz, $R_L \ge 50 \text{ k}\Omega$	
Minimum differential pressure range span	10 P		
Minimum volume flow range span	10 m³/ł		
Minimum air velocity range span	1 m/s		
		Differential pressure	
Operating modes	Air volume		
	Air velocity		
Accuracy	± 2 % of the operating range		
Protection standard	IP65 (according to EN 60529)		
Enclosure	ASA, grey (RAL9002)		
Ambient conditions	Temperature	-5—65 °C	
Ambient conditions	Rel. humidity	< 95 % rH (non-condensing)	

Area of use

- $\bullet\,$ Differential pressure, air velocity $^{\!\!\!(1)}\,$ or volume flow $^{\!\!\!(2)}$ measurement in HVAC applications
- Overpressurizing applications: clean rooms to avoid particle contamination or staircases for fire safety

• Underpressurizing applications: restaurant kitchens and biohazard laboratories

 \bullet Volume flow application: ensuring the minimum legal ventilation rate (m^3/h) for buildings

Wiring and connections			
Article type	HPS-FLP HPS-G-		LP
Vin	18-34 VDC	18-34 VDC	13—26 VAC

А	Modbus RTU (RS485), signal A		
/В	Modbus RTU (RS485), signal /B		
AO1	Analogue / modulating output (0-10 VDC / 0-20 mA / PWM)		
GND	Ground AO1	Common gr	ound*
Connections	onnections Cable cross section		1,5 mm²

*Attention! The -F version of the product is not suited for 3-wire connection. It has separate grounds for power supply and analogue output. Connecting both grounds together might result in incorrect measurements. Minimum 4 wires are required to connect -F type sensors.

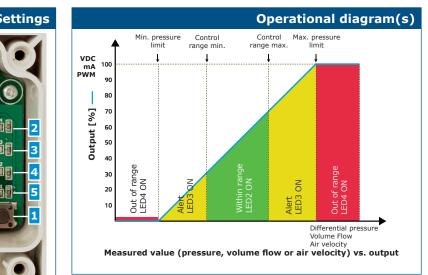

together might result in incorrect measurements. Minimum 4 wires are required to connect -F type sensors. The -G version is intended for 3-wire connection and features a 'common ground'. This means that the ground of the analogue output is internally connected with the ground of the power supply. For this reason, -G and -F types cannot be used together on the same network. Never connect the common ground of -G type articles to other devices powered by a DC voltage. Doing so might cause permanent damage to the connected devices.

⁽¹⁾ Only when K-factor of fan / drive is known. If K-factor is unknown, volume flow can be calculated via multiplying the duct cross-sectional area (A) by the air velocity (V) using the formula: Q = A * V (2) By using an external PSET-PTX-200 Pitot tube connection set

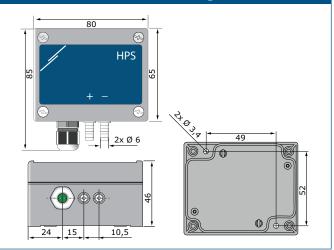

HPS-X--LP Differential pressure transmitter

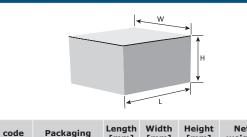

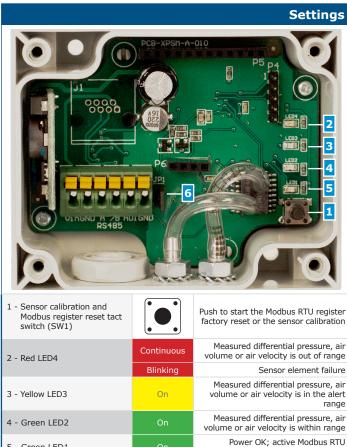

Fixing and dimensions

Packaging

	Article code	Packaging	Length [mm]	Width [mm]	Height [mm]	Net weight	Gross weight	
	HPS-FLP HPS-GLP	Unit (1 pc.)	95	85	70	0,12 kg	0,13 kg	
		Carton (10 pcs.)	495	185	87	1,20 kg	1,30 kg	
		Box (60 pcs.)	590	380	280	7,2 kg	7,8 kg	

5 - Green LED1 communication PWM output is connected to internal +3,3 VDC or +12 VDC source** 6 - Internal pull-up resistor jumper JP1 PWM has to be connected to external voltage source via external pull-up $\Box \Box$ resistor

indicates closed position of the jumper.

** The voltage source depends on the value in holding register 54.
