

MTP-G

24 V potentiometer with min & max settings

MTP-G010-AT potentiometer is intended for direct control of EC fans / motors and actuators. It requires a supply voltage of 24 VDC or 24 VAC and provides a stepless output signal that can be set by a rotary knob with off-position. The output range is adjustable via two internal trimmers between Vmin (0–7 VDC) and Vmax (3–10 VDC). Its splash-proof enclosure is suitable for both inset and surface mounting.

Key features

- Infinitely variable control of the output voltage
- Adjustable minimum (Vmin) and maximum (Vmax) output by internal trimmers
- A splash waterproof enclosure
- Inset or surface mounting
