MVSS1-60CDM SDP-M010-DC DHDR8-24-36	Remote control for AC fans with single-phase motor, equipped with thermal contacts. The maximum motor current is 6 A. The fan speed controller can be mounted on a DIN rail. Via the external potentiometer, fan speed can be set. At zero position, the motor stops. The TK monitoring function disables the motor in case of overheating. The maximum distance between potentiometer and fan speed controller should remain limited.
