

Solution details

The AC fan will be controlled based on the pressure level.  
The pressure setpoint and other parameters of the DPSPF pressure controller can be modified via Modbus RTU communication.

Suited for motor type: 230 VAC voltage controllable motors  
Motor control: Electronic fan speed controller  
Minimum motor speed: Make sure that the minimum voltage remains high enough to avoid stalling of the motor.  
Maximum motor current: 6 A

 Consult the fan manufacturer for the correct wiring
