

Solution details

The AC fan will be controlled manually via the two-speed transformer fan speed controller SC2A1.  
The external contact for activate the fan (Available NO and NC contact) and external contact for high/low speed switching.  
TK monitoring for thermal motor protection.

Suited for motor type: 230 VAC voltage controllable motors  
Motor control: Transformer fan speed controller  
Minimum motor speed: Make sure that the minimum voltage remains high enough to avoid stalling of the motor.  
Maximum motor current: 2,5 A

 Consult the fan manufacturer for the correct wiring
